Keyword : System, Administration, Visual Basic 6.0

Abstract:

This writing contains administrative information on the payment of tuition fees Senior High School 100 Jakarta, because there are no tools on the computer that handles the administration of payments so often experienced difficulties, including: length of student records data and administrative data payment of tuition fees that are not arranged in order according to with the main number of students. Under these circumstances, the writer makes a system with reference to the current procedure. This system is expected to help overcome existing problems in order to improve efficiency, effectiveness and productivity of work and quality of schools. The author will use the display program Microsoft Visual Basic 6.0.
